The Jellyfish Ate

The scary jellyfish who came out of Random Lake that ate up elephants and caribou, like 100 or 16, because he didn't want them to go back. Nineteen years ago a pink jellyfish came. Elephants and caribou were swimming but the jellyfish was at the end and ate them. So now the elephants and caribou are in the forest with poppies and they never go back because they are too scared. The jellyfish stays at the end because it doesn't want to go back to the island.

The end.
